PROFESSIONAL SUMMARY

Full Stack Senior Engineer with 5 years of experience building high-impact, production-grade systems at scale. Expertise in TypeScript, Python, Golang, AWS, and Kubernetes — with a track record of leading cross-functional teams, shipping AI-native products, and owning complex distributed architectures end-to-end.

TECHNICAL SKILLS

Frontend: React, NextJS, TypeScript, JavaScript

Backend: Python, NodeJS, Golang, FastAPI, FastMCP, NestJS, Django, Sanic, LangChain, LangGraph, CrewAI, KeyCloak, OAuth, MCP

Cloud & DevOps: AWS, Kubernetes, Docker, Terraform, Kafka, GitHub CI/CD, Jenkins, OTEL, Prometheus, Grafana, Datadog, ElasticSearch, SQS

Databases: PostgreSQL, DynamoDB, Redis, MongoDB, Weaviate / Vector DB

EXPERIENCE

Senior Software Engineer

May 2025 – Present

TATA 1mg

Gurugram, India

- **Lead Engineer** for B2B Order Management (Pharmacy & Diagnostics), serving **500k+ MAUs** and managing a team of 5.
- Drove end-to-end deployment of a **Voice AI** telesales platform (POC → production), integrating payment APIs and order flows with multiple AI vendors; **delivered 2× conversation** throughput over human agents and **Rs 3.5 Cr** in annual savings.
- Technical owner of Collection Center (**200+ stores, 300+ labs**, Rs. **1–5 Cr** GMV/month); led architectural decisions and shipped pediatric booking support (6 yrs), unlocking a new user segment and increasing order volume.
- Designed and shipped a **security scanning module** integrated into **DeputyDev** — automatically auditing **380+** repositories across the 1mg codebase and surfacing **15,000+ security issues**, replacing ad-hoc manual reviews with a continuous, platform-wide signal.
- Implemented **1mg's MCP server** using **FastMCP**, exposing platform-wide services (pharmacy, lab order placement, and more) as tool-callable APIs — enabling AI agents to interact with **production systems** in a standardized, extensible interface.
- Architected and shipped **My Vaccines** — a new service-led platform on Tata 1mg serving **20k users/month** — introducing a dedicated Service category to decouple vaccination journeys from pathology-based flows, and building a common extensible foundation for future service offerings.

Senior Software Engineer

Jan. 2022 – Apr. 2025

MeeTri Infotech

Noida, India

- **Led Order** integrations with SBI, TCS, and ICICI for pharmacy order flows generating **Rs 3 Cr/month** in revenue, coordinating across banking partners and internal payment infrastructure.
- Designed a **Multi-Actor Authorization Engine** for an agritech partner in **Golang** using **OSO** — implementing **RBAC** with fine-grained policy evaluation integrated directly into the auth service pod
- Built a **high-throughput** B2B Payment and Order Aggregator migrating from **AWS SQS to Kafka** — handling **3,700 RPM** at **P99 3ms latency**, significantly improving reliability and throughput for downstream order processing.
- Designed **Multi-Tenant Identity & Order Fulfillment** Services for an agritech platform (**30K MAUs**) using **MERN + GraphQL**, managing 13 services on **Kubernetes**.
- Designed and built **Cerberus** - an API Gateway for third-party vendors - incorporating **RBAC**, rate-limiting, **caching**, event hooks, and dashboards.
- **Automated infrastructure** provisioning with **Terraform** across environments; established full observability via **CloudWatch** and **Grafana** — eliminating configuration drift and creating a single pane of glass for system health.

Software Engineer

Sep. 2021 – Dec. 2021

Innovation Cell, Ministry of Education

Delhi, India

- **Core contributor** to a national Innovation Management Platform serving **30K** users across 30+ educational institutions — built on **Django, Next.js, Redis**, and **AWS** with OpenAI-powered features for ideation and collaboration.
- Built a **Patentability Engine** in Node.js using OpenAI APIs — enabling users to assess patent viability from uploaded documents and structured data in **AWS Redshift**, **streamlining early-stage IP discovery**.

DevOps Engineer

Jan. 2021 – Aug. 2021

Rishikul Herbal

Delhi, India

- **Provisioned and managed AWS infrastructure** across dev, staging, and production using **Terraform** — eliminated configuration drift and reduced deployment time from **2 hours to 13 minutes**

EDUCATION

GGs Indraprastha University

Bachelor in Software Development

Delhi, India

2018 – 2021

CERTIFICATIONS

FullStack Open (University of Helsinki) | DevOps with Docker | Apache Kafka Fundamentals
